Customer Reviews

What are essential oils? What you should look for, including origin of plants for oils, processing, application, dilution, "integrity of skin," and age of client? The author gives credit to her source materials, NAHA or National Assn. of Holistic Aromatherapy. That's good, and a reliable source. Remember, in a short booklet like this, it is wise for you to have other resources to research. What

are the 7 oils good for ADHD? Someone in our family uses essential oils for that very purpose with some impressive results. Well, we have Roman chamomile, lavender (great oil for many purposes), mandarin, ylang ylang, vetiver, frankincense and patchouli. There's also brief information on a complex formula that puts many oils together. The author also mentions the need for exercise, meditation and patience. I wish she had included some summary of real-life experiences. I know you have to be careful with testimonials and claims (the FDA is watching). You also have the opportunity to join the author's mailing list and receive updates on holistic ADHD treatments. Sounds good.>> If this review is helpful to you, please click on YES below. Helpfully read, would have rated it 5 stars or they would have included the dosage for the awake oil blend. Still very informative read

It's informative. I still have yet to try the recipes.
