Microsoft Excel 2010 Introduction Quick Reference Guide (Cheat Sheet Of Instructions, Tips & Shortcuts - Laminated Card)

Excel® 2010 Introduction

Creating a New Workbook

1. Choose **F11** (NEW).
2. Select **WORKBOOK** from the **FILE** menu.

Entering New Data

1. Click on a cell by clicking on it, or by using the arrow keys to move to the desired cell.
2. Type the data. If it contains a formula, press **=** before typing the formula.
3. Press **ENTER** or **CTRL+ENTER** to move to the next cell.
4. Press **CTRL+ENTER** to move to the next cell.

Pick from a Drop-Down List

To pick from a list of data values, use the **DATA** menu.

1. Select the cell.
2. Press **DATA** > **DATA VALIDATION**.
3. Select **LIST** from the **SOURCE** list.
4. Press **OK**.

Repeating the Contents of a Cell

1. Click on the cell to copy.
2. Press **CTRL+C**.
3. Click on the cell to paste.
4. Press **CTRL+V**.

Editing the Contents of a Cell

1. Click on the cell to edit.
2. Press **F2** to enter edit mode.
3. Make the changes.
4. Press **ENTER** to save the changes.

Undo or Redo an Action

Press **CTRL+Z** to undo an action. Press **CTRL+Y** to redo an action.

Resizing Column Width/Row Height

1. Click on the column or row header.
2. Drag the border to the desired width or height.

Inserting Rows or Columns

1. Select the row or column to insert.
2. Press **RIGHT-CLICK** > **INSERT**.

Deleting Rows or Columns

1. Select the row or column to delete.
2. Press **RIGHT-CLICK** > **DELETE**.

Deleting Cell Contents

1. Select the cell to delete.
2. Press **DELETE**.

Clearing Formatting

1. Select the cell to clear.
2. Press **CTRL+SHIFT+F**.

Deleting Rows, Columns, or Cells

1. Select the rows, columns, or cells to delete.
2. Press **RIGHT-CLICK** > **DELETE**.

To delete rows or columns:

1. Select the rows or columns to delete.
2. Press **CTRL+SHIFT+DEL**.

To delete cells:

1. Select the cells to delete.
2. Press **CTRL+SHIFT+DEL**.

Formatting Numbers

1. Select the cells to format.
2. Press **CTRL+1** to open the **FORMAT CELLS** dialog box.
3. Select the **NUMBER** tab.
4. Select the desired format.
5. Press **OK**.

Borders, Shading, Text Color

1. Select the cells to format.
2. Press **CTRL+1** to open the **FORMAT CELLS** dialog box.
3. Select the **BORDERS** tab.
4. Select the desired border style.
5. Press **OK**.

Draw a Border Grid

1. Select the cells to format.
2. Press **CTRL+1** to open the **FORMAT CELLS** dialog box.
3. Select the **BORDERS** tab.
4. Select the desired border style.
5. Press **OK**.

Erase a Border

1. Select the cells to format.
2. Press **CTRL+1** to open the **FORMAT CELLS** dialog box.
3. Select the **BORDERS** tab.
4. Select the **NO BORDERS** option.
5. Press **OK**.

Aligning and Merging Cells

1. Select the cells to align or merge.
2. Press **ALIGN** or **MERGE** in the **FORMAT CELLS** dialog box.

Viewing the Worksheet as it Will Print

1. Press **CTRL+P** to open the **PRINT** dialog box.
2. Press **OK** to print the worksheet.

Entering Dates

To enter a date, use the **DATE** function.

1. Select the cell to enter the date.
2. Type **=DATE(Year, Month, Day)**.
3. Press **ENTER**.

Entering a Sequence of Numbers

1. Select the first cell in the sequence.
2. Press **CTRL+D** to fill the rest of the sequence.

For all series options, e.g. workbooks:

1. Press **CTRL+D** to fill the rest of the sequence.
2. Press **CTRL+D** to fill the rest of the sequence.

Moving Within the Worksheet

Customer Reviews

This item came in handy to have available on my desk for quick reference. I recently purchased a new computer and it contained Windows 7 and a lot of the routine processes were somewhat

different. Even if you have basic knowledge of Microsoft Excel, this is a handy reference laminated sheet to have available.

The "ribbon" above the working window of 2010 Microsoft Office products can be quite confusing to us "oldsters" who started using them back when Windows 3.2 was the best thing going. This compact fact sheet is a BIG help!

I got this "cheat sheet" for the 2010 version of Microsoft's OneNote program for my wife as a quick reference. It does include a number of the most basic features of the program, but I was not impressed overall. Quite a few of the features are not included on the sheet, and so it does not do the job of providing a quick reference to all of the capabilities of OneNote. The sheet itself is of nice quality; firm plastic laminate and quite legible. The OneNote program is a great tool for organizing a variety of subjects and both my wife and I both really enjoyed using the 2007 version of MS OneNote. The 2010 version is a substantial upgrade in capability as well as some changes in format, so I was hoping that a good quick reference guide would help ease my wife into the new version. Alas, the Intro Quick Reference Guide being reviewed is just too basic to be of much value.

This sheet is what Onenote has in its opening notebook. If you want the information just start the program for the first time and there it is. Don't buy the sheet.

MS Excel reference guide. Cheat sheets are quite handy as long as problem/info needed is not complex. Just about worth price. Vendor performance excellent. Shipped in 1 day & arrived quickly even though USPS. GN

Again, this is much better than buying a \$60.00 book and only reading the first 2 chapters. I do a lot of PowerPoint presentations so am fairly proficient in it, but I just went to PP2010. The little card gives me the basics and I don't have to spend 30 minutes looking through a book for what I need. Takes up less space on my already overloaded book shelf too.

this is a great short cut after you have read the book you can't remember everything and this gives a quick reference so you don't have to look up everything up in the book. the guide has all the main commands and makes it easy to find when your in the middle of a project.

I have used Excel on my Windows PC for many years. Just recently bought a MacBook. The commands are quite similar, although they vary slightly and the Excel for the Mac does slightly different things. This sheet makes it easy to find a command quickly.
