Introduction
Ever since mankind has been inventing new food making processes like boiling, baking, brewing, stewing, the science of food preparation down the ages has not changed much, even though the world has gone through astonishing technological development. However, many of these food making, and preparing processes have been made easier, with the use of technical machinery. So in grandmother's time, when food was prepared by chopping, slicing, dicing, and mixing and mincing was done by beating up the spices and the herbs in a pestle and mortar, nowadays we have food processors ready at hand.

Customer Reviews

I was very disappointed. It didn't talk much about the food processor. Just some recipes I can make without food processor
